About US

Founded in 2004, we have 20 years of production experience and specialize in manufacturing fences of various materials and styles, including PVC fences, aluminum fences, iron fences and other product.

Our excellent quality has enabled our products to enter the global market, while our dedicated service fully meets the diverse needs of our customers.

We have 5 workshops to meet the production of different fences, equipped with automatic baking ovens and advanced equipment to ensure product quality and enable mass production.

Our factory also supports customized services, providing you with the best fence solutions.

Certificates

Our company strictly adheres to international standardization management systems. In 2008, we obtained the ISO 9001 Quality Management System Certification, establishing a comprehensive quality control mechanism that covers the entire process from raw material procurement and production process control to after-sales service.

We have received on-site visits from more than 20 countries. Through a customized process of transparent factory tours, technical seminars, and sample testing, We have also launched a green channel for small-batch custom sample production. Currently, we maintain active cooperative relationships with numerous international clients, winning global trust with our open attitude and transparent demonstrations.

We have participated in the China Import and Export Fair (Canton Fair) on multiple occasions and attended numerous international exhibitions. We firmly believe that each exhibition is an opportunity to engage with the industry and co-create with our clients. In the future, we will continue to leverage exhibition platforms to deepen our global presence and provide cost-effective railing solutions to more international customers.

Our team

Workers Team

Our skilled workers, with rich experience, are proficient in various fence production processes. They strictly control quality from raw materials to finished products, supporting both mass production and customization, and endowing each fence with reliable quality through exquisite craftsmanship.

Service Team

Our service team has been deeply rooted in the guardrail industry for many years and serves customers worldwide. From demand communication and solution design to order follow-up and after-sales support, a dedicated person is assigned to each process to respond quickly to customer needs. For customized projects, the team collaborates efficiently with various departments to ensure the precise implementation of solutions, providing customers with one-stop professional services that guarantee worry-free experiences throughout the process.

Let's start with us

Fence product

Mental fence

How to choose the right type of metal fence?

Comparison of Metal fences

Application of Metal fences

- Aluminum Alloy fences for Outdoor general scenarios (courtyards, roads)
- Stainless Steel fences for Wet environments (swimming pools, coastal areas)
- Iron fences for Retro decoration, high-security demand scenarios
- Galvanized Steel fences for Industrial guardrails, highway barriers

Corrosion Resistance

Aluminum Alloy fences: Strong (protected by surface oxide film)

Stainless Steel fences: Extremely strong (especially 304/316)

Iron fences: Weak (anti-corrosion treatment required)

Galvanized Steel fences: Medium (protected by galvanized coating)

Product Service Life

Aluminum Alloy fences: High.(15-20)

Stainless Steel fences: Extremely high (20-30)

Iron fences: Medium (8-12)

Galvanized Steel fences: Medium (10-15)

Strength

Aluminum Alloy fences: Medium

Stainless Steel fences: High

Iron fences: Extremely high

Galvanized Steel fences: High.

Maintenance Cost

Aluminum Alloy Fences: Low

Stainless Steel Fences: Low

Iron Fences: High

Galvanized Steel Fences: Medium

LIANGXIN FENCE

Stainless Steel Fences

Stainless steel railings are protective facilities centered around stainless steel materials (such as 304, 316, etc.), formed through precision processing. They incorporate both safety protection and decorative functions, and are often installed in public places, playing a crucial role in both architectural protection and transportation infrastructure.

LIANGXIN FENCE

Iron Fences

Iron fences are protective facilities made from iron as the base material through welding, weaving, or casting processes, widely used in construction, transportation, industrial, and other sectors. Their core functions include isolation, safety protection, and decorative enhancement.

Our company's iron railings mainly include two types: cast iron fences and wrought iron fences, and we are able to provide customized services for customers.

LIANGXIN FENCE

Zinc Steel Fences

Zinc Steel fences are protective facilities made from zinc-alloy steel (such as hot-dip galvanized steel strips or zinc-steel composite steel) as the base material, manufactured through processes like cutting, welding, and surface treatment (e.g., electrostatic spraying, hot-dip galvanizing).

Their core advantage lies in combining the high corrosion resistance of zinc with the high strength of steel, incorporating safety protection, durability, and aesthetic appeal. As a lightweight railing solution widely used in modern construction and infrastructure, they are commonly applied in factories, schools, and public spaces.

High strength and safety

high cost-effectiveness.

LIANGN FENCE

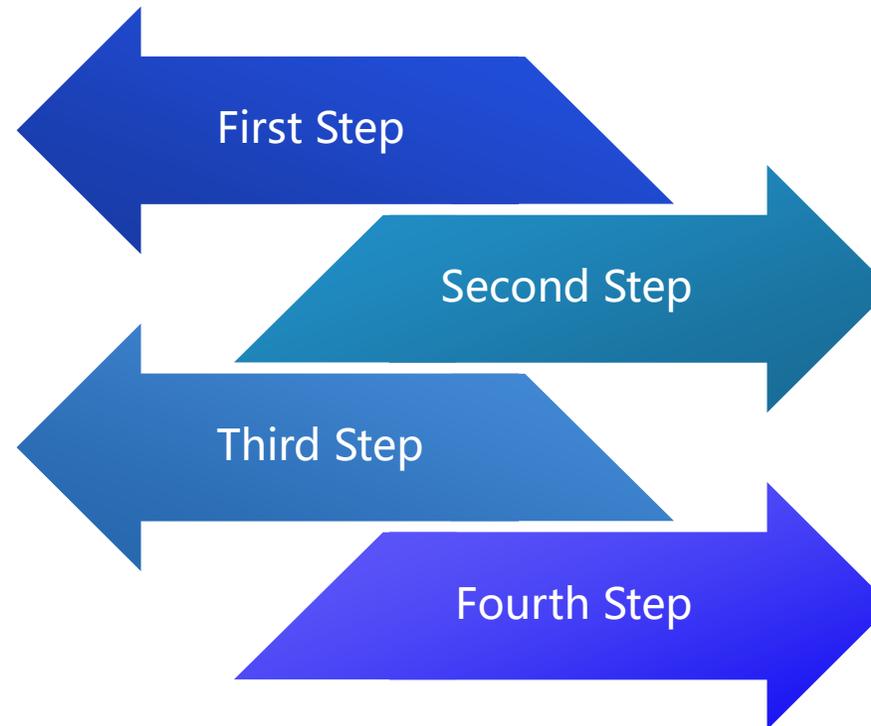

Production Process Overview

Sales Consultation

Provide suitable railing recommendations and design proposals based on customer needs and the surrounding environment, and offer corresponding quotations

Cargo Inspection and Logistics Delivery

After confirming that there are no defective items, the goods will be loaded and transported. Insurance will be purchased for long-distance transportation, and real-time tracking via logistics tracking numbers will be provided. We also assist with ocean freight transportation arrangements.

Sample Approval and Production Control

After confirming that the single-piece sample is error-free, production will commence with the following Key processes (such as welding strength and coating thickness) are subject to real-time sampling inspection by quality inspectors. Dedicated staff will be assigned to follow up on the production progress at each stage to ensure compliance with specifications and timely delivery.

After-sales Service and Installation Guidance

We provide comprehensive after-sales service and detailed installation guidance, with online customer service staff available to resolve your issues at any time

LIANGXIN FENCE

Welcome your inquiries

We provide professional and comprehensive aluminum alloy customization services, precisely controlling every step from the design of the plan to the delivery of the finished product, to create exclusive FENCE solutions for you.

Customized Solutions

Our seasoned team customizes aluminum alloy products to your unique needs, covering various scenarios and aesthetics. From architecture to electronics, we turn your ideas into reality with tailored solutions.

High - quality Guarantee

We source from top suppliers, ensuring materials meet standards. With advanced processes like extrusion and anodizing, and strict quality checks, our products excel in precision, performance, and appearance.
